of hinges required per door
Maximum door weight

Ø 26 mm	10 lbs	15 lbs	20 lbs
Ø 35 mm	20 lbs	40 lbs	60 lbs
Number of hinges	2	3	4

Door Height

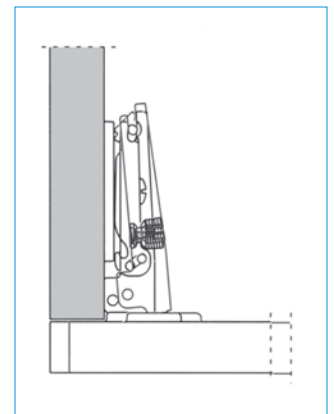

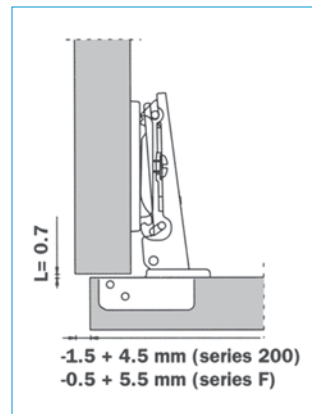

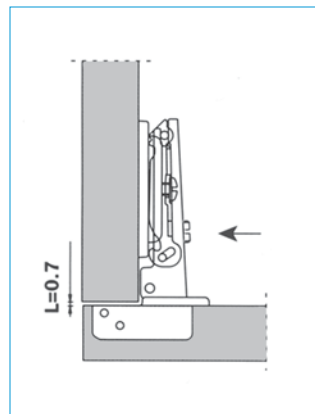

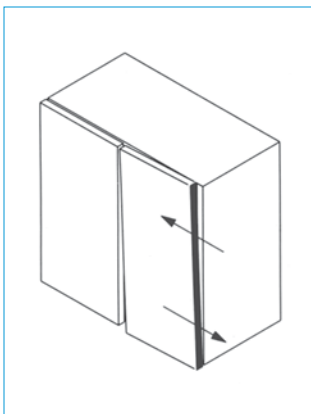

SALICE Parallel And Compensating Side Adjustment

HINGES

Side to side adjustment of the door with Series 200 and F hinges

An ingenious adjustment system allows the door to be moved sideways without changing the gap behind the door (the "L" value of 0.7 mm remains constant).

Compensating side adjustment. A patented system exclusive to all Salice 200 and F series hinges.

The adjustment screw operates in conjunction with the inner leaf of the hinge arm.

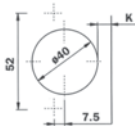

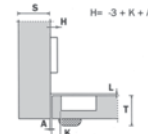

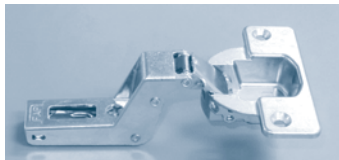

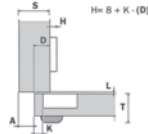

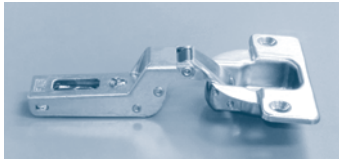

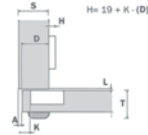

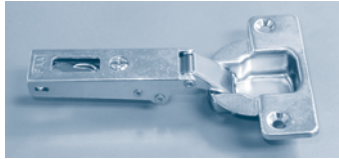

The door moves in only one direction - parallel to the carcass and without a gap developing between the door and the carcass. No further adjustments are necessary. There is no gap to reduce.

EUR-O-DOR[®]
Opening minds to great designs[™]

EDGE BANDING

MELAMINE

A single layer, melamine resin saturated paper which has been printed, embossed and cured in line to produce a finished edgebanding.

- Fade resistant.
- Available in widths from 3/8" to 24" wide.
- Stocked in standard melamine colors.

POLYESTER

Polyester edgebanding consists of two or more layers of resin saturated face papers, backers and release papers which have been fused in a lamination process to produce a heavy weight, finished product.

- Offers an exact match to high and low pressure laminates. We use the same décor face papers.
- Available in custom finishes.
- Widths from 3/8" to 24" wide.
- High heat resistance, pliability, formability and good internal bond strength.
- Used in straight line, contour and softform applications.

PVC

An extruded thermoplastic edgebanding made of poly vinyl chloride.

- Huge color and pattern availability matching most laminate manufacturers including:
 - Arborite®, Formica®, Nevamar®, Pionite®, Wilsonart®
 - Flakeboard®, Funder America, Inc.®, Levesque®, Panolam Industries®,
 - Coveright®, Panval®, Roseburg®, Tafisa®
- Quick turn-around times on custom matches.
- Stock program matching more than 900 high and low pressure laminate colors.
- High impact resistance.
- Same day shipping on stock colors.

VENEER

All our veneer products start with the pre-selection of premium grade veneers. The quality of the veneer selected allows us to achieve consistent texture, color and pattern in the grain.

VENEER EDGEBANDING

- Available in regular sanded and preglued, backed fine sanded and preglued, backed and fine sanded.
- Fleece backers add strength to the veneer and the finger joints.
- Thick veneers available in rolls and strips from 1mm to 5mm thick.
- Consistent thickness and high quality finger joints in all our veneer edging, virtually eliminates waste.

VENEER SHEETS

Olon uses only premium flat cut veneers. These are book matched, tenderized, pre sanded and then laminated to various specialty backers or another veneer layer to eliminate black line.

- Backers act as a barrier, which prevent the bond adhesive from penetrating the wood surface while ensuring that finishing materials do not effect the glue bond.
- The laminated construction eliminates splitting, bleed-through and grain raise.
- Consistent appearance and face matching, free of naturally formed defects.
- Fine sanded to provide a uniform face surface ready for final finishing.
- Various cuts available including rotary, rift and quarter.

FURNITURE, CABINET AND DISPLAY LIGHTING

Low Voltage - 12V available in Halogen & Xenon 10 & 20 W att

Pockit® # TR-POCK _____

- ✓ An industry standard!
- ✓ Recess or surface mount with mounting ring included
- ✓ Light kits with ELT60-CON transformer included
