Prato-

UNO

Uno is a natural impregnation oil product made of vegetable oil and natural resin. Used for staining and sealing wood floors, furniture and woodwork. Uno hardens in the wood similar to varnish however without creating a film on the wood's surface. This finishing oil, rich in natural resins, offers a very high resistance to wear and tear while enhancing the grain and letting the wood breathe.

Ingredients: Linseed oil, Tung oil, safflower oil, vegetable wax and isoparaffin

Available in 18 colors (see Pg.7)

SECONDO

Secondo can be applied directly on unfinished wood or after the application of our Uno staining oil. This finishing oil is made of vegetable oil and natural resin and is used to seal and waterproof wood floors, furniture and woodwork without creating a film on the surface. Secondo provides high resistance to traffic while maintaining the wood's natural appearance.

Ingredients: Linseed oil, Tung oil, safflower oil, vegetable wax and isoparaffin

BRIO

Brio is an oil specially devised to be applied to walls, ceilings and other wooden surfaces. In one single application, Brio stains, seals and waterproofs without creating a film on the woods surface or diminishing its detail.

Ingredients: Safflower oil, Tung oil, linseed oil, vegetable wax, isoparaffin, land and natural iron oxides

Available in 18 colors (see Pg.7)

Verde

PAREO

Pareo possesses excellent waterproof and resistance characteristics for finishing exterior wood. A penetrating natural oil that is perfect for finishing decks, doors, windows and garden furniture as well as any other wooden construction. Pareo can be applied to new, restored or treated wood with a brush or cloth in very thin coats to avoid over saturation. A roller or spray gun is not recommended.

Ingredients: Safflower oil, Tung oil, Linseed oil, isoparaffin, land and natural iron oxides

BONITO

Bonito is a natural soap used for the frequent maintenance of oiled floors, furniture and woodwork. Should be regularly alternated with Sancio protector for oiled wood.

Ingredients: Composed of coconut oil and soya by-products

SANCIO

Sancio is designed to protect and maintain oiled surfaces. It is the only protector recommended for use on surfaces oiled with Prato-Verde oils for wood. Use once a month instead of Bonito soap. The use of Sancio protection leaves a very thin wax coat therefore slightly increasing the lustre of the wood surface.

FINICO

FINISHING PRODUCTS

TUNG OIL

Tung oil is 100% natural, non-polymerized and non-toxic. It penetrates the wood and offers a transparent finish that does not yellow with time. It is often used to finish surfaces that come into contact with food; e.g. Counters and cutting boards as well as toys, furniture, floors, doors and woodwork. Tung oil can also be used on exterior applications such as stone and metal to prevent rust. It contains no additives, petroleum products or VOCs. Truly an excellent choice for eco-construction projects. Tung oil offers a durable, soft and hard water, alcohol and alkaline resistance to finish your wood.

Ingredients: Pure Tung Oil

LINSEED OIL

Linseed oil is the ideal choice for refreshing furniture beams, woodwork and floors that are currently finished with linseed oil. This particular linseed oil has been double boiled and is pale in color. It is a natural product that is non-toxic and does not contain any VOCs. It can be used as a sealant before a wax or gum-lac application. Linseed oil is often used in oil-based varnishes. Also perfectly adapted for use as a sealant on stone, cement, clay, slate or any other porous stone.

Ingredients: Double boiled pale linseed oil, without lead drying agent (<0.05%)

HEMP OIL

Hemp oil is suitable for finishing woodwork, paneling and furniture as well as children's toys and wooden surfaces in contact with food. Hemp oil is used for wood finishing and is 100% natural, non-toxic, without volatile organic compounds (VOCs) or petroleum products. After applying several layers, it waterproofs the wood and leaves no surface film. Hemp oil can be applied to milk paint for protection.

Ingredients: First press Hemp Oil

PAINT STRIPPER

Paint Stripper cleans all types of paints, glues, varnishes, lacquers and ceramic grouts. It works well on acrylics, alkyds, urethanes, polyurethanes, enamels and latex. Use on wood, metals and cement. Paint stripper is a biodegradable product with low toxicity; it is non-carcinogenic and non-mutagenic. It has a slight odor and is ideal for domestic uses.

Ingredients: N-methyl 2 - Pyrrolidone, N, N Dimethyl Formamide and D-Limonene

CITRUS SOLVENT

Finico's Citrus solvent is used to dissolve or dilute oils, resins, waxes and artistic paintings in oil. It is ideal for stripping or removing wax from floors and wooden furniture. Citrus solvent is a vegetable essence extracted from the peel of citrus fruit and contains no petroleum products. The citrus solvent is colorless; it has a pleasant orange odor and can be used as a substitute for turpentine or mineral spirits. Citrus solvent may be used to clean any oily surface.

Ingredients: 100% D-Limonene

LOW ODOR THINNER

Low odor thinner is used to dilute or dissolve oils, resins, waxes and artistic oil paints. It is ideal for stripping or removing wax from floors and wooden furniture. Low odor thinner has a slight citrus scent and can be used as a substitute for turpentine or mineral spirits (Varsol). The low odor thinner can be used to clean any oily surface.

Ingredients: Highly refined isoparaffin solvents and oranges terpenes (D-Limonene)

ODORLESS THINNER

Finico's odorless thinner is a highly refined mineral solvent made from isoparaffin. It does not irritate the skin and can be used as a substitute for turpentine or mineral spirits. It is perfectly suited for people with allergies (hypo-allergenic). Odorless thinner is used to dilute and dissolve oils, resins, waxes and artistic paintings in oil. It can also be used to strip or remove wax from floors and wooden furniture wax or oil.

Ingredients: Highly refined isoparaffin.

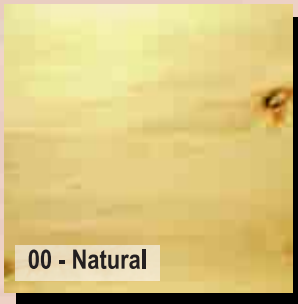

A quality wood oil enhances the wood grain and provides strong durability. As a result of the oil's deep penetration into the wood, there will be no cracking or peeling as occurs with a varnished surface. Easily repairable, oil finishes allow for localized touch-ups without having to completely scrape or sand your surface. Wood-oils also have the advantage of being easy to apply; with a rag, brush or roller.

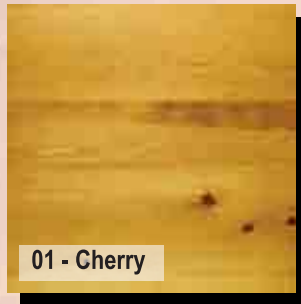

Wood oils have long been identified with the finishing of softwoods or for achieving a rustic and country look to the applied surface. Now available in many different stains, wood oils are an excellent choice for finishing hardwood floors or to achieve exotic and contemporary styles
