GLASS AND ALUMINUM: Materials for Every Style

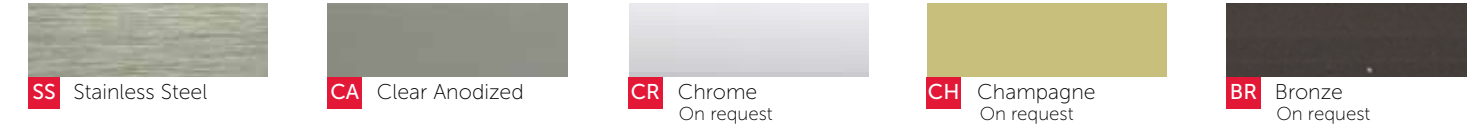

We are Canadian distributors of aluminum doors and architectural glass, that enable you to push the boundaries of design with our unique products.

Inspiration comes from the latest European styles and, in addition to our collection of kitchen cabinet and furniture doors, offers a full range of innovative related products custom-made according to your needs and specifications. Express your creativity with our design + concept!

in collaboration with *Barazin*

For doors with aluminum extrusions, the glass inserts are tempered (except Lacobel and mirror), and there are two holes for hinges. Additional holes for hinge/handle are available as an option. Colors may slightly differ from the ones illustrated.

LEGEND:

ANTA - ALUMINIUM DOOR FOR KITCHEN, BATHROOM AND FURNITURE

With our design + concept, you can choose from a selection of 10 different types of anodized aluminum extrusions, most of which are offered in 2 finishes : Clear Anodized (CA) and Stainless (SS). Sturdily built, our doors with aluminum extrusions are supplemented by a comprehensive collection of glass inserts on the cutting edge of style. These range from unique, contemporary decorative glass products to timeless doorlite designs to printed or laminated glass that provides endless possibilities for creating your own styles. What's more, all the glass used in our cabinet and furniture doors are tempered, ensuring durability and safety. ANTA doors are assembled with care, using reliable materials that guarantee a product with impeccable design, right down to the last detail.

NEW! Upon request, ANTA doors are now available in Chrome (CR), Champagne (CH) and Bronze (BR) finishes.

Price Range \$ to \$\$\$

Inserts 3-4-5 mm unless otherwise noted.

To help make each home's design unique, we have selected a range of elegant glass products that will add a touch of sophistication to your decor. To help simplify your choice, our decorative glasses are divided into three collections: Timeless, Contemporary and Classic.

Would you like to add a little color to your decor? Then check out our lacquered and laminated glass collections.

What's more, we offer you a selection of non-welded doorlites that are custom-made and can be integrated into both wooden and aluminum doors. They're sure to add a touch of artistry and elegance to any home.

These glass products can be smoothly integrated into the desired decor of your home, whether classic, rustic or modern.

DID YOU KNOW?

Our supplier is one of the biggest importers of flat glass in Eastern Canada. They are recognized in distinguishing themselves by the quality and exclusivity of their glass products. Its 100,000 square foot facility in Montreal is equipped with state-of-the-art technology that enables it to handle all steps of glass processing under one roof: cutting, drilling, beveling, polishing, tempering, lamination, printing and lacquering. The result? Shorter turnaround times and quality control at every stage of production.

CUSTOMIZED LACQUERED GLASS

It is possible to lacquer extra-clear 3 to 12 mm-thick glass with the color of your choice for door inserts, counters or backsplashes. We have developed a highly resistant lacquer designed especially for glass.

LAMINATED GLASS

Laminated glass is extremely safe because it consists of two layers of glass bonded together with a color film interlayer. It is available in a clear (C) or milky (M) finish. From a minimum thickness of 7 mm, it can be used with aluminum extrusion 91 or as a glass countertop, backsplash or wall finish.

LAMINATED GLASS

Glass can be used on its own as a frameless door. Laminated, lacquered or tempered glass is combined with decorative hinges to create a clean and modern style.

When laminated glass is used for a glass wall or counter whose edge is showing, please note that the different layers of superimposed glass will be visible, as in the photo.

DOOR LITES

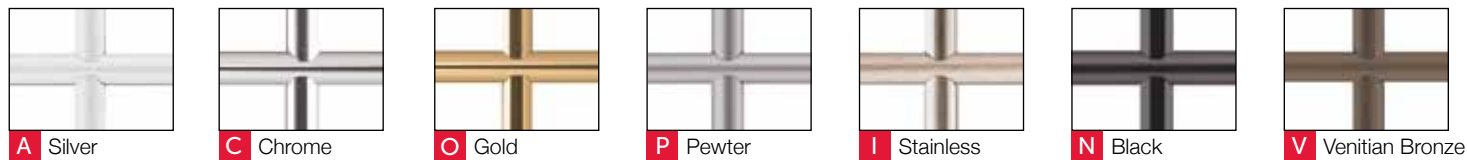

MODEL RIVERA 376

Custom-made to provide a sophisticated touch to your home, these non-welded doorlites retain their elegance over time. Whether you want a classic look or simple, clean design, you're sure to find a model that will seamlessly complement your decor. These doorlites can be integrated into both wooden and aluminum doors, depending on your preference.

Most of the models, which feature clean, modern lines, were created by Jean-Claude Poitras, a renowned Quebec designer. Elegant style has never been more accessible.

IMAGINE - DIGITAL CERAMIC PRINTING ON GLASS

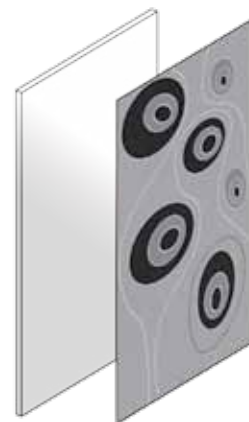

DIGITAL CERAMIC PRINTING ON GLASS

Digital ceramic printing is the newest sensation in the world of glass. This cutting-edge technology makes it possible to print images, textures and motifs on any sheet of glass—whether part of a cabinet door, counter, backsplash or glass wall—to match it with your interior design.

The glass is first printed and then placed in a tempering oven, where the heat fuses the ceramic pigments to the glass. The resulting image is resistant to scratches and UV.

In this section, you will find a selection of images and designs that may be customized with the Imagine color chart so that they will fit perfectly with your decor. It's also possible to print an image or design of your own; please contact your distributor if you would like a quote.

Printing can be done on both Clear or Acid Etch glass. The model number that ends with a 0 indicates a print on clear glass and the one that ends with a 1 will be printed on Acid Etch glass.

COMPLEMENTS

In order to help you create a stylish living environment, we also offer you a range of products that are as practical as they are elegant. Whether for the kitchen or the office, these complementary items can serve as a visual focal point or add a subtle finishing touch to your decor.

Manufactured entirely in Montreal and customized according to your specifications, we offer your imagination free rein.

MILANO BOX TAMBOUR DOOR

SLAT CHOICE

	40 mm	Wind-Mix	Wind	Standard
SS				
CA				

The SS finish for Milano Box Tambour Doors differs slightly from the SS finish for aluminum extrusions.

Imported from Italy, fully adapted to the size of your unit and ready to install, these anodized aluminum tambour doors are a stylish alternative to traditional cabinet doors. Due to their sturdiness and their smooth sliding system, you'll be able to appreciate this ultra-chic accessory for many years to come.

Available in Clear Anodized (CA) and Stainless (SS) aluminum, as well as 2 types of slat: regular (Standard) and openwork (Wind). You can also combine regular and openwork slats in the same set of doors (Wind-Mix).

MODEL MARBLE 1160/1161

PRINTED+LACQUERED GLASS

Our custom-made illuminated shelving can be used on its own or embedded in a unit, thereby making it possible to light up both the counter and the unit. Made of clear anodized aluminum, white acid-etched glass and fluorescent tubes or LEDs, the illuminated shelving generates comfortable, diffused lighting.

Inside a wall cabinet, ALUX is transformed into a practical lighting system that brightens the interior and objects. It also lights the work surface underneath the unit.

ALUX can be customized to suit specific needs. Two fluorescent fixtures for more lighting, specific widths or depths and particular types of glass are among specialities ALUX can provide.

THE ULTIMATE IN EUROPEAN DESIGN

Currently the hottest counter surface in Europe, glass is set apart from other materials by the fact that it is extremely hygienic and highly versatile from a design standpoint. In fact, various options—laminated, lacquered or printed glasses—are available to help you create cutting-edge decor. When it comes to glass counters and backsplashes, the possibilities are endless!

Qline.ca™

Quinko-Tek
INTERNATIONAL

in collaboration with *Barazin*

Using glass for backsplashes and counters offers a host of benefits:

- Aesthetically pleasing
- Non-porous, so it eliminates the risk of cross-contamination, making it the most hygienic type of counter on the market
- Resistant to stains and high temperatures
- No maintenance required
- LED lighting can be integrated to create exceptionally striking illumination

LACQUERED GLASS

Lacquered glass is a single layer of 10 to 19 mm-thick glass for counter and 6 mm-thick for backsplash with the interior side lacquered in the color of your choice. Extra-clear glass is the best option for light colors.

PRINTED GLASS

Let your imagination run wild and create unique decor by either selecting a model from the Imagine collection (p. 22) or using your own photo or design as a starting point.

MODEL PRIMAVERA 1140/1141
