### Corporate Profile

King Slide has been manufacturing premium quality products for over 30 years. It is a world leader in the innovation, design and engineering of its product specialties.

Over the course of its history the company has evolved into one of the most important suppliers of high quality ball bearing slides to the computer rack server industry, including the related electronic accessories.

The company has 3 full-time engineering teams working respectively in product design, manufacturing and the development of proprietary sophisticated machinery used in its manufacturing processes.

King Slide has now developed a series of ball bearing slide products serving home and office furniture manufacturers that has become the new standard of the industry and the envy of the competition.

We invite you to learn more about the company and to enjoy the experience of trying its products.
